A semantically meaningful latent space

The KL-term enforces simplicity in the latent space, encouraging learned semantic structure and *disentanglement*

More latent regularization

Pure reconstruction

A semantically meaningful latent space

The KL-term enforces simplicity in the latent space, encouraging learned semantic structure and *disentanglement*

Pure reconstruction ⟷ *More latent regularization*

Rate-distortion theory: *neural compression*

Autoencoding is a form of (neural) compression!

$$\text{ELBO} = \left\langle \log p_\vartheta(x \mid z) \right\rangle_{q_\varphi} - D_{\text{KL}} \left(q_\varphi(z \mid x) \,\|\, p(z) \right)$$
