Real-world data for live industrial manufacturing

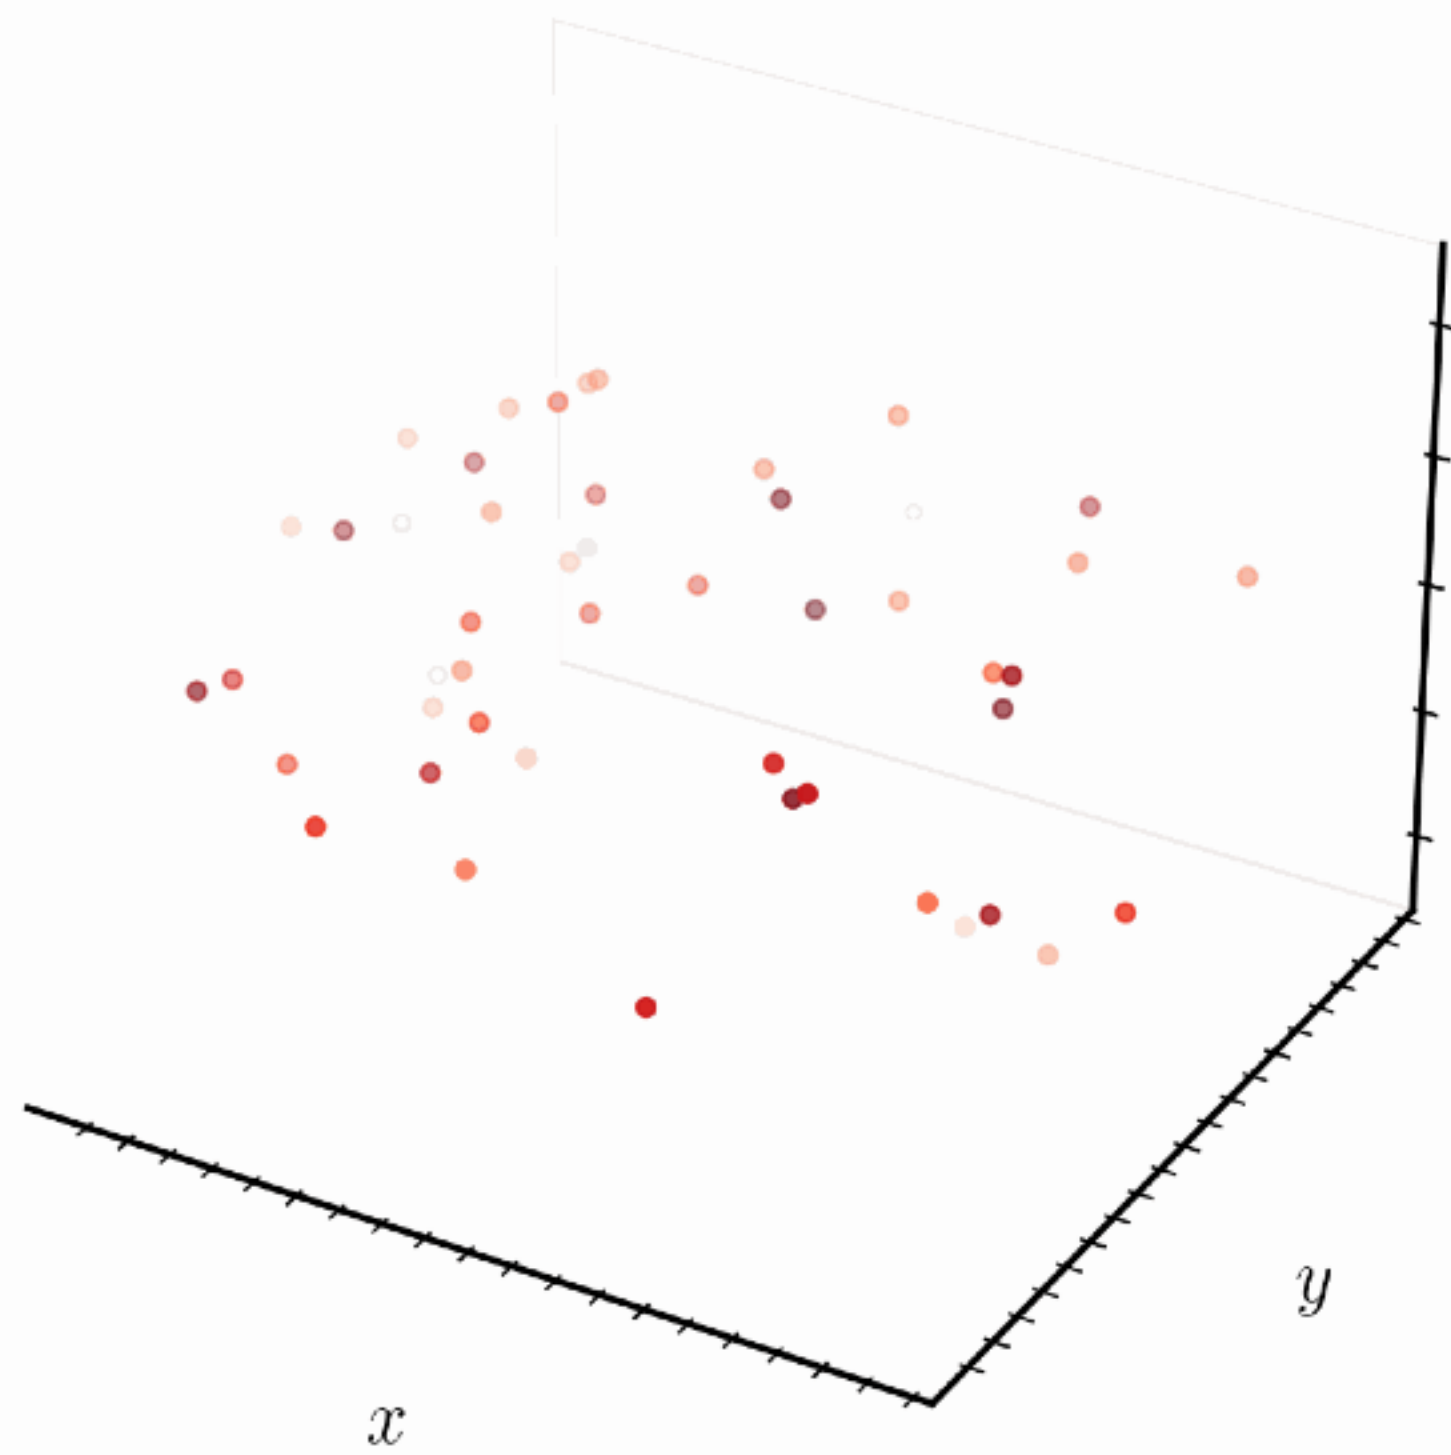

The pursuit of low-dimensional structure

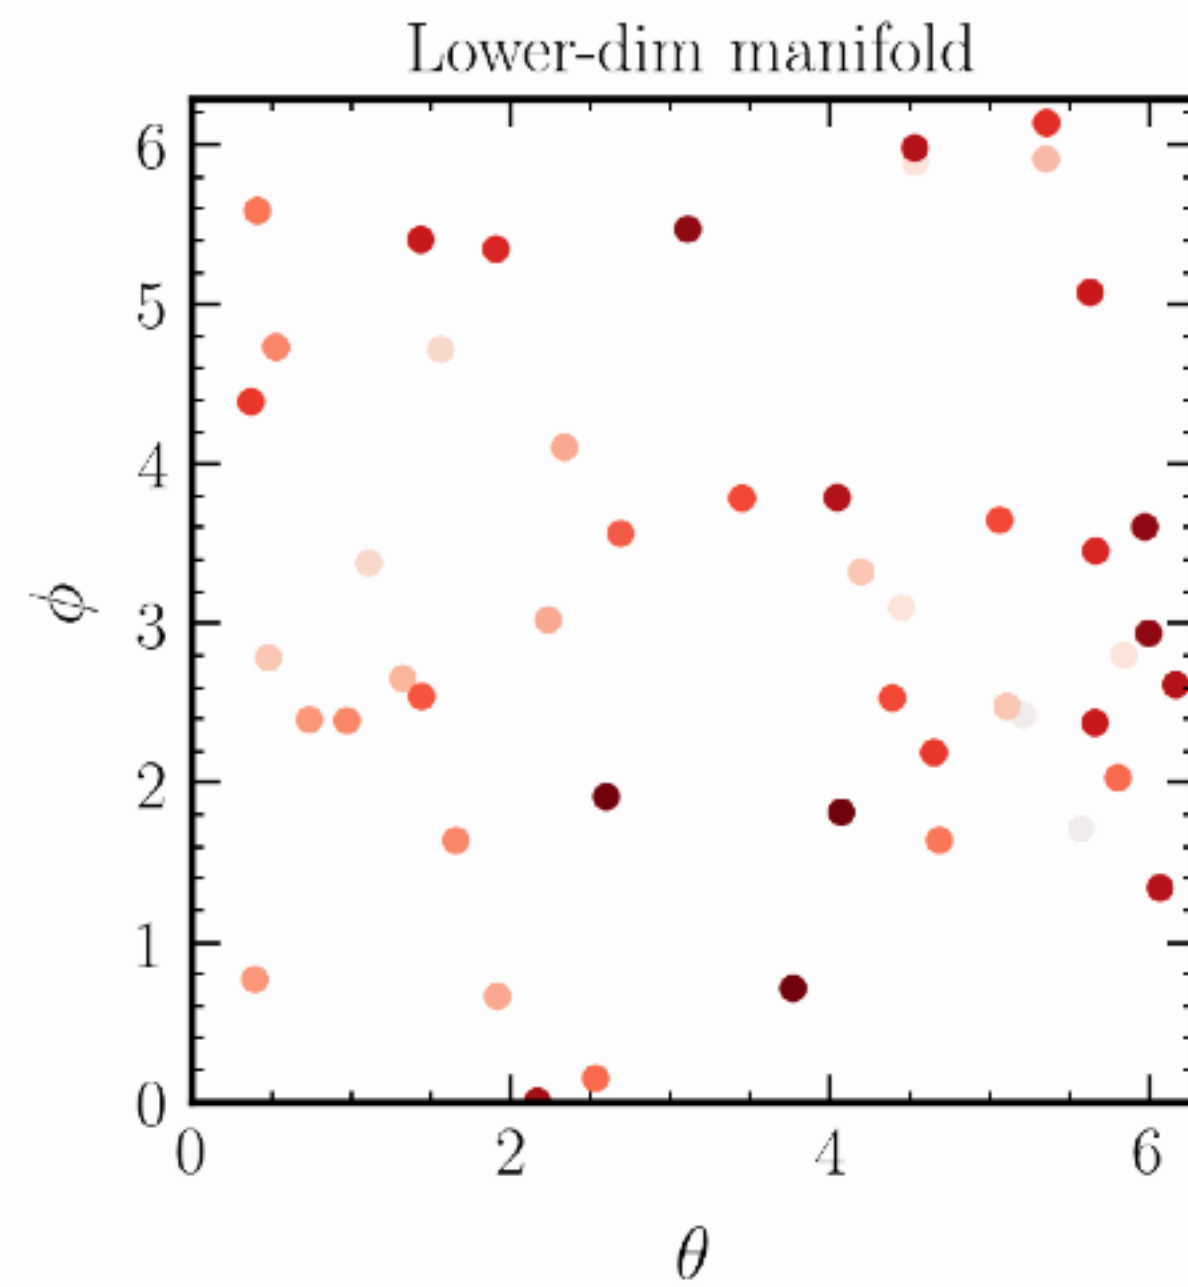

*"Easy to model" z*

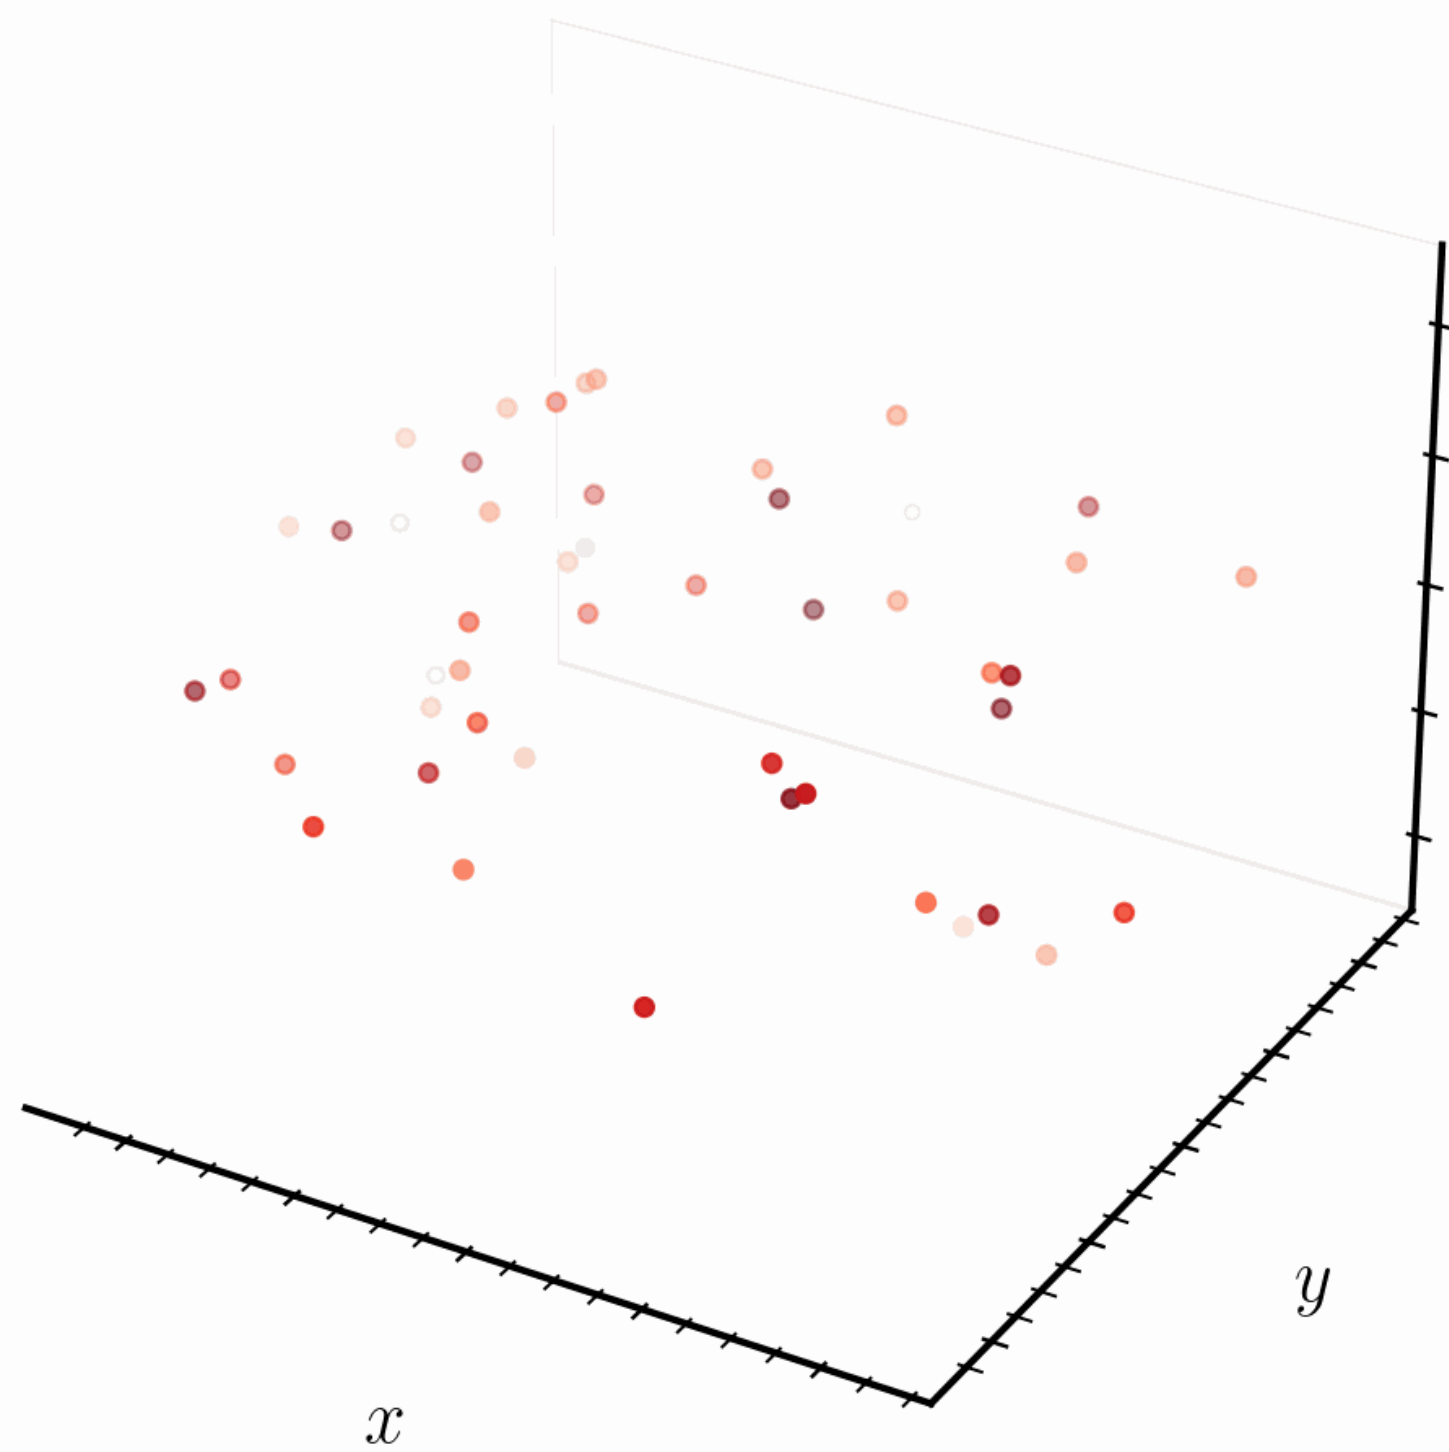

**"Difficult to model"  $x$**

$$p(z \mid x)$$

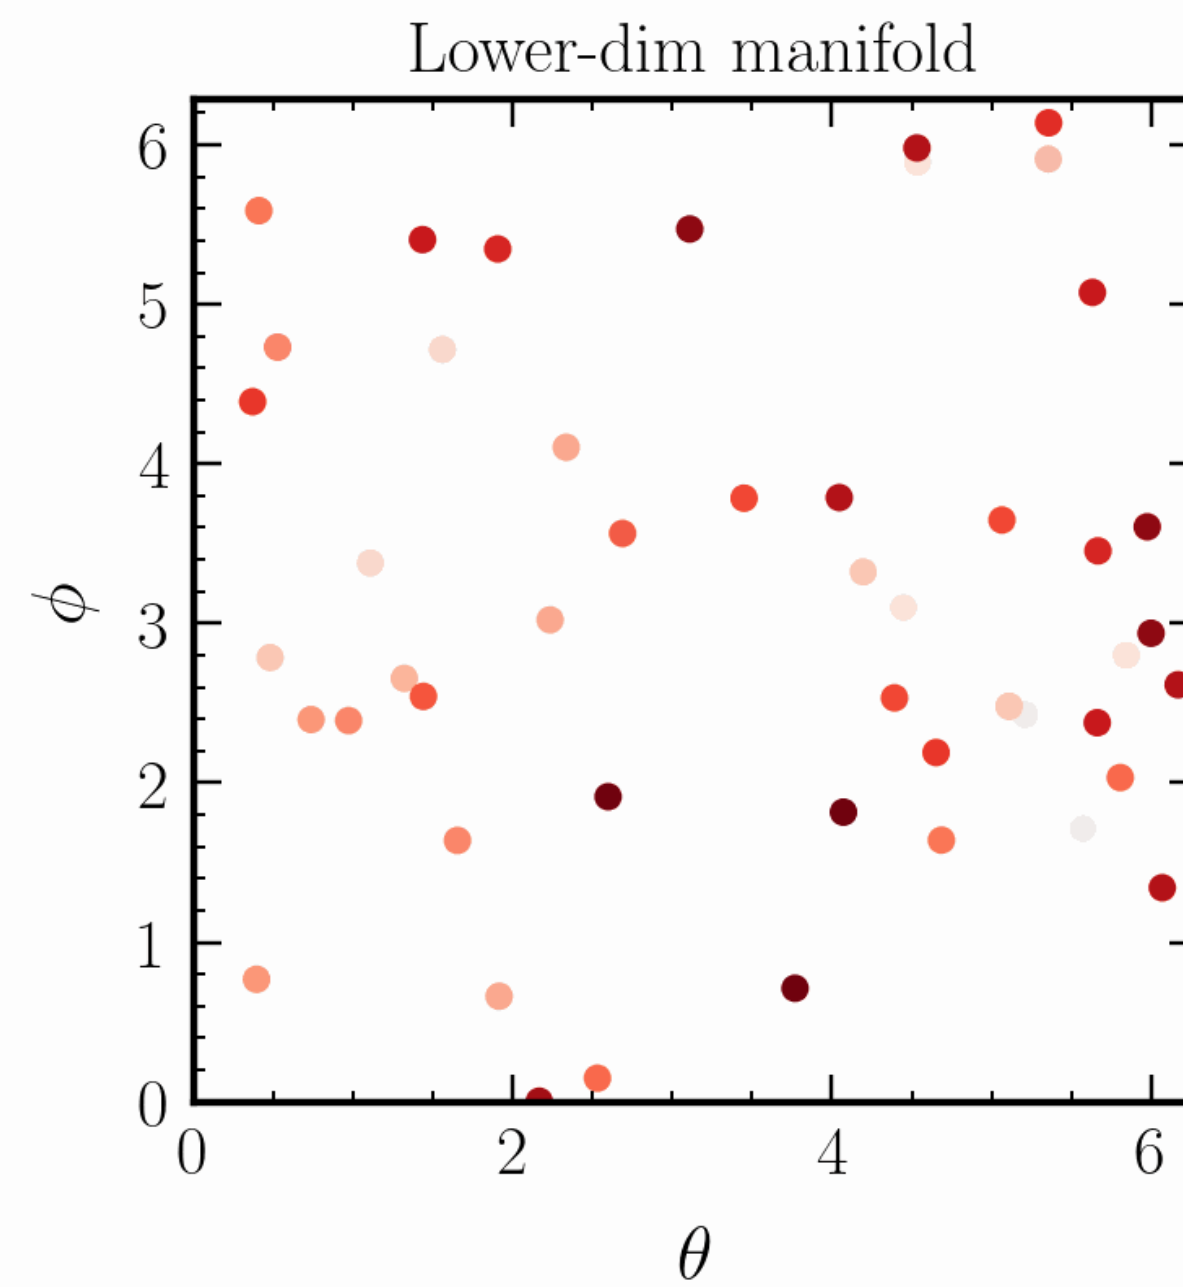

$z$

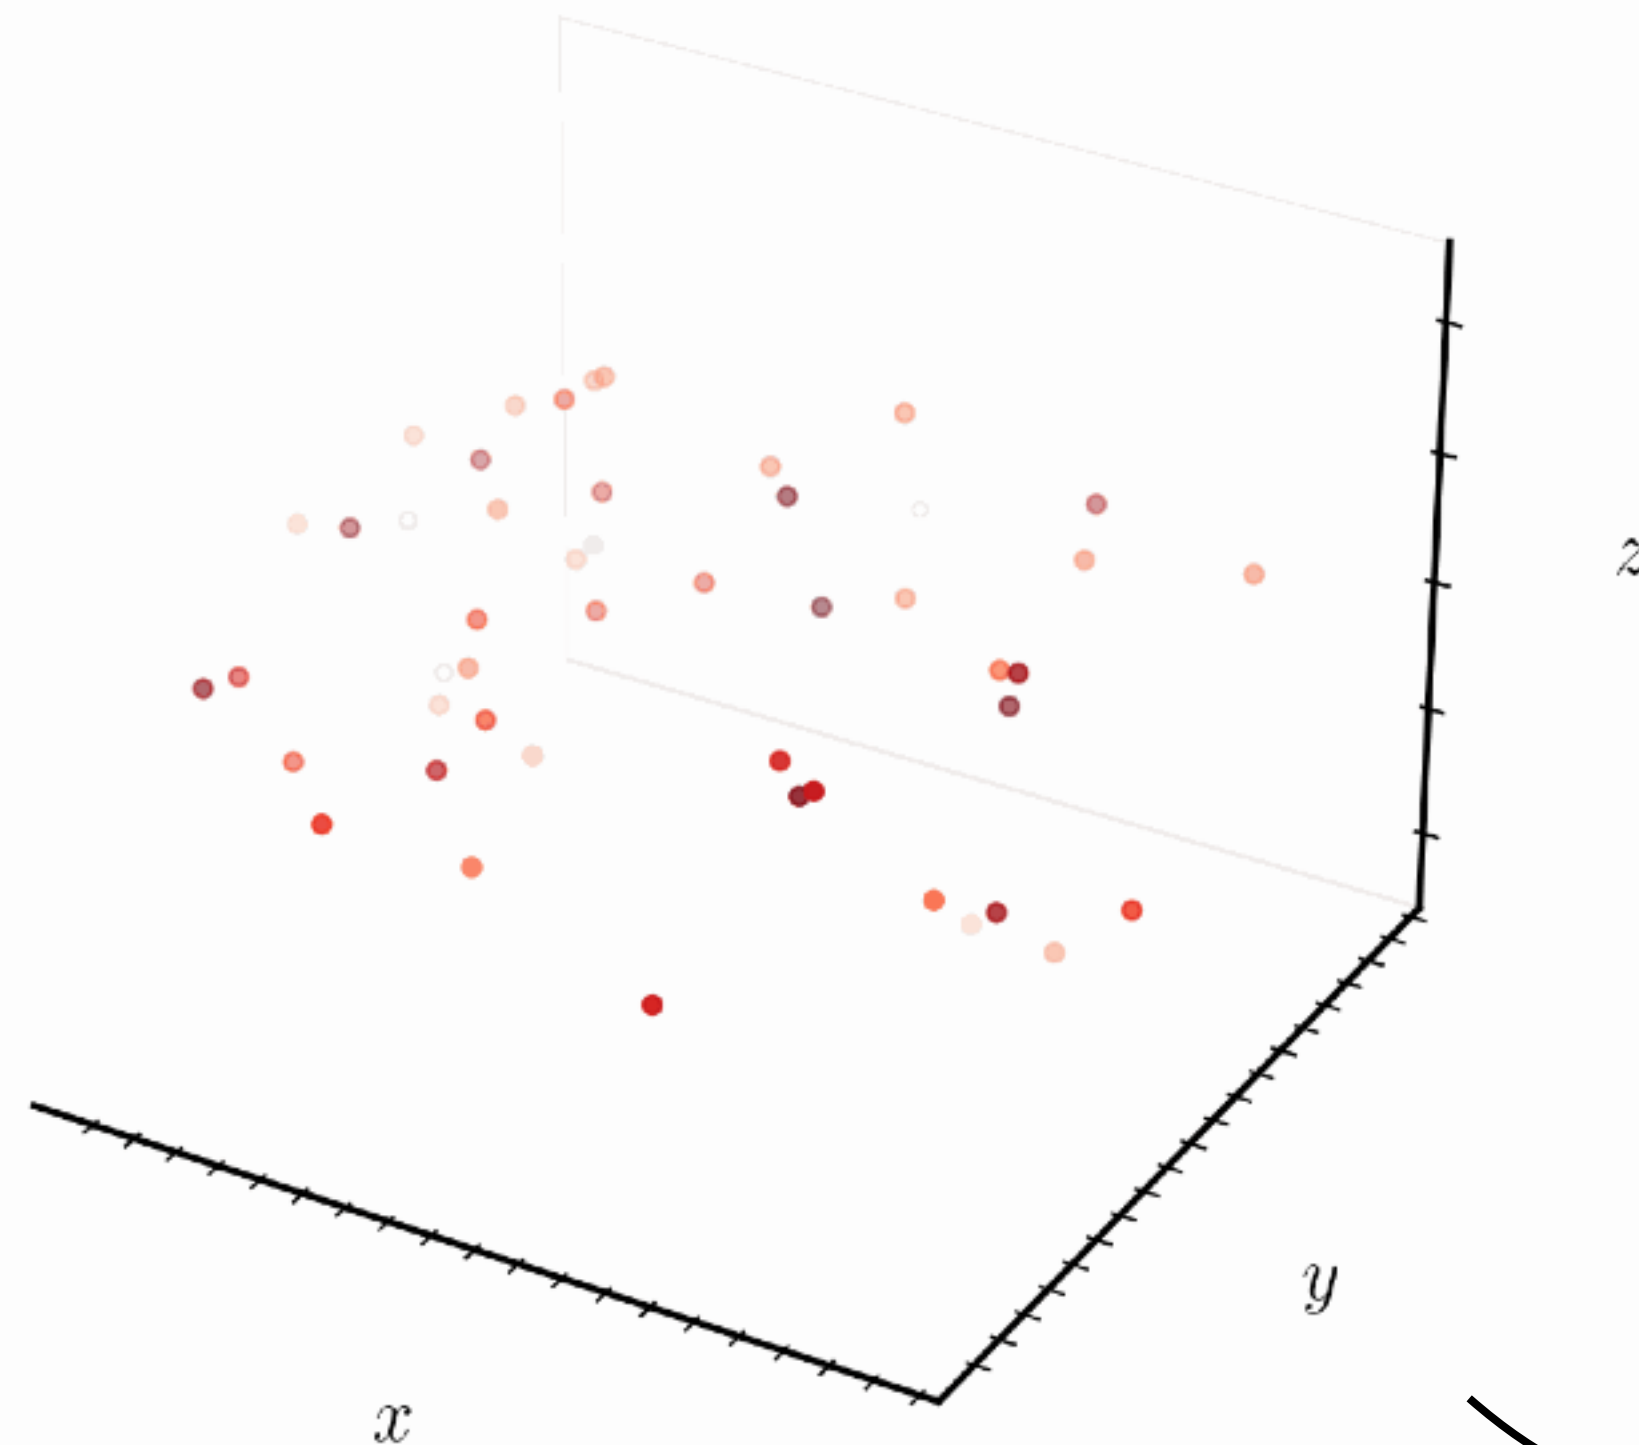

$z$

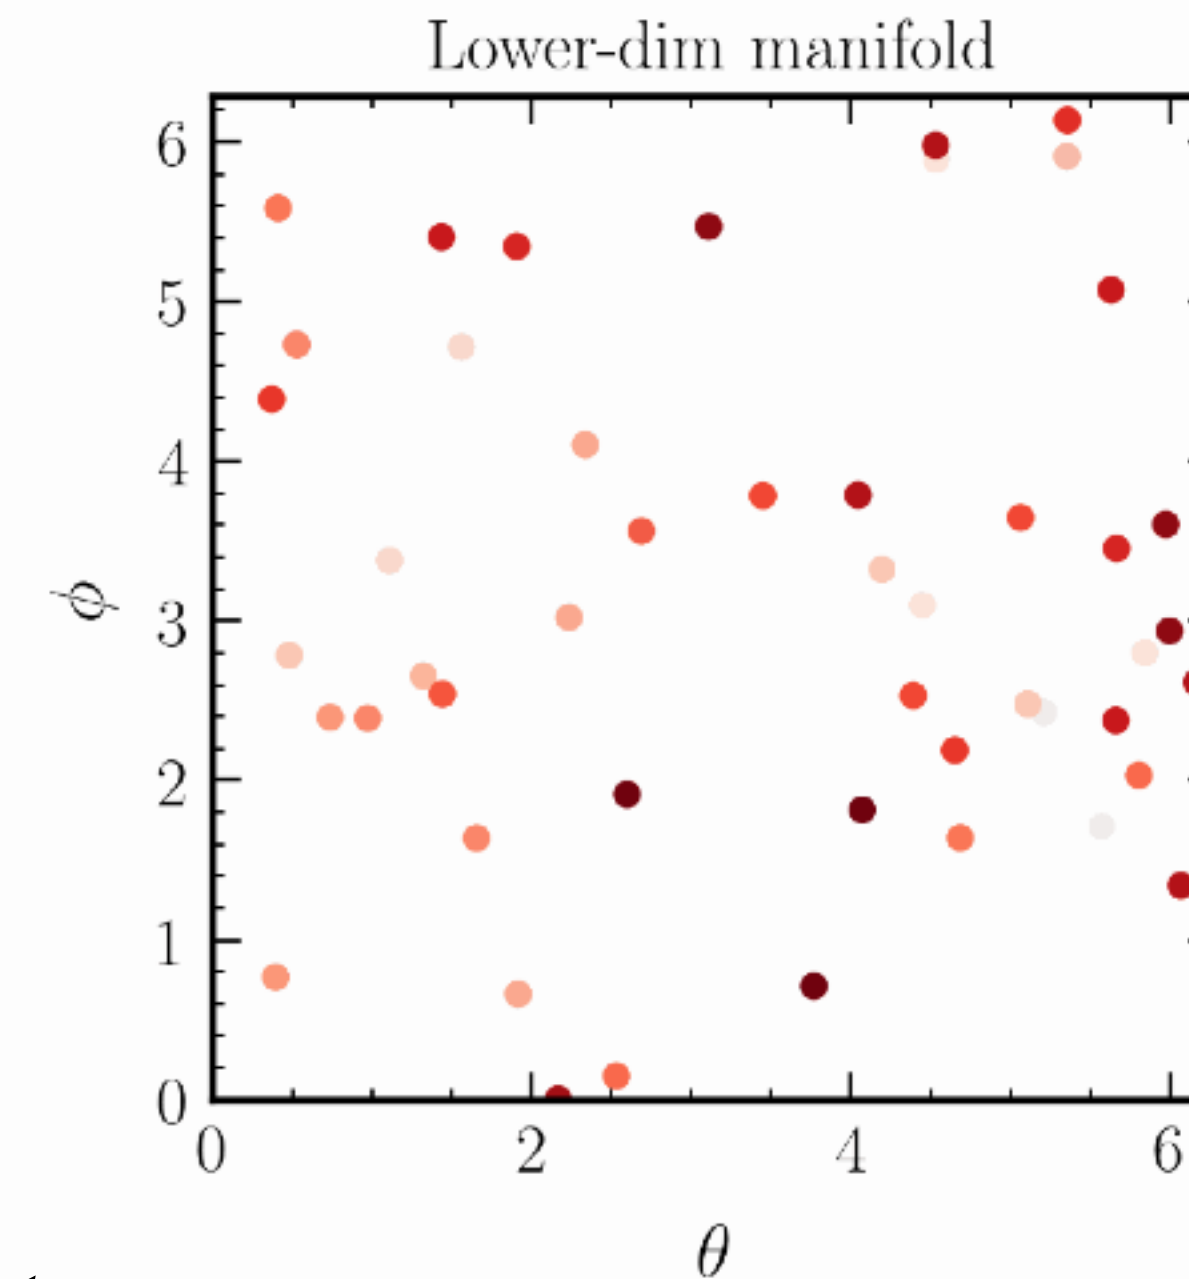

# The pursuit of low-dimensional structure

Real-world datasets often live in structured low-dimensional manifolds

“Difficult to model”  $x$

“Easy to model”  $z$

$p(z \mid x)$

# Latent-variable modeling

Learn lower-dimensional structure in the data distribution
