The data distribution

We often work with data distributions in physics (modeled or empirical)

Simulators

 $x \sim p(x)$

Simulators are ubiquitous: they prescribe a way to sample from the data distribution

Collider data

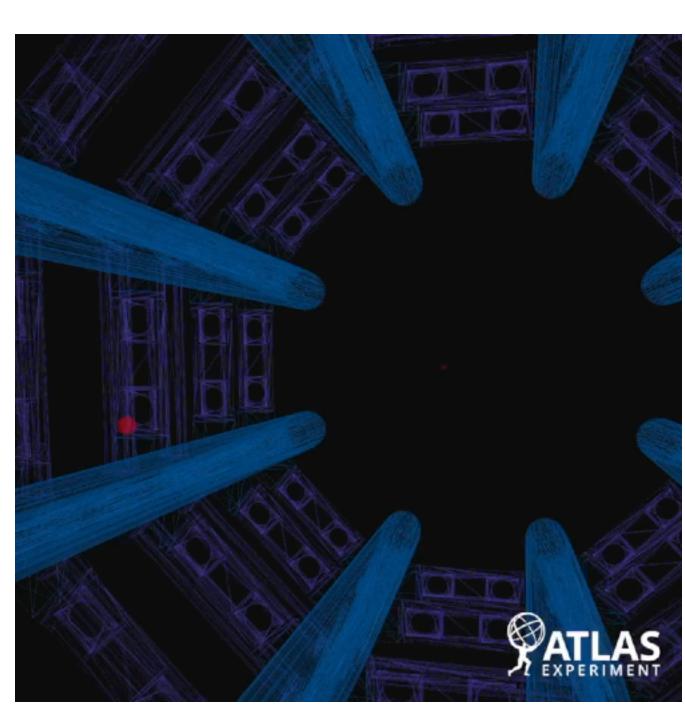

particles $\sim p(\text{particles})$

Cosmology data

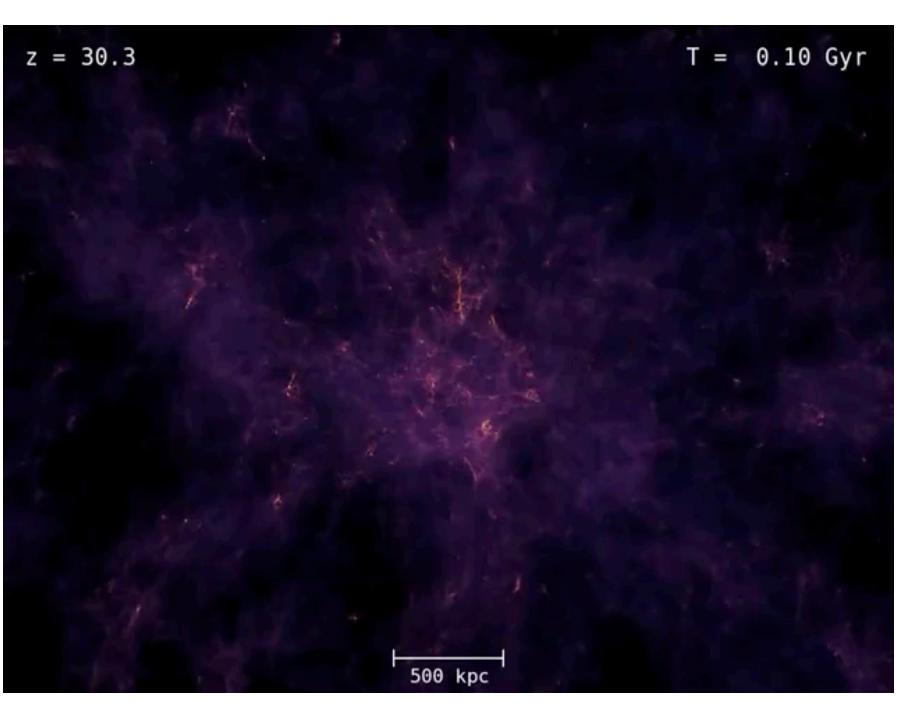

particles $\sim p(\text{particles})$

Molecular dynamics

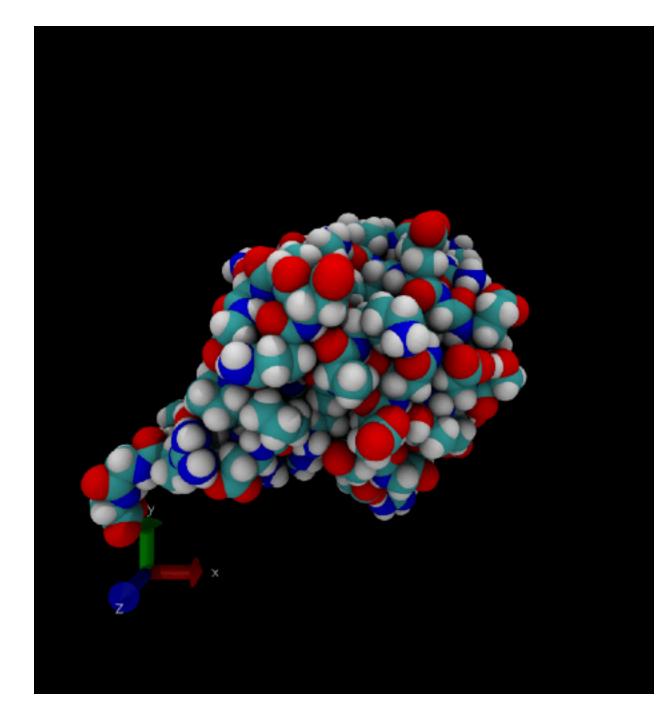

configurations $\sim p(\text{configurations})$

[C. Cesarotti with ATLAS]

[Aquarius simulation]
