The denoising objective

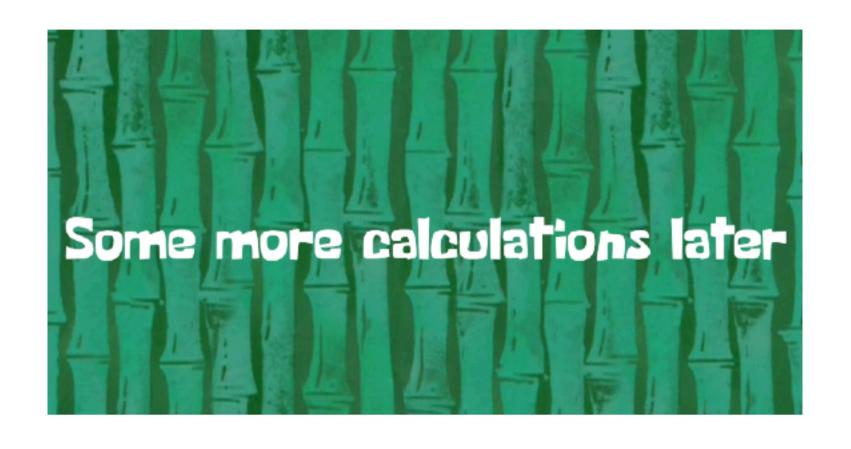

Given the nature of the forward (noising) process, $q(z_{t-1} \mid z_t, x)$ can be computed analytically

 $q\left(z_{t-1} \mid z_t, x\right) = \mathcal{N}\left(z_{t-1}; \mu_q(x_t, x_0), \sigma_q(t)\mathbb{I}\right)$

$$p_{\theta}\left(z_{t-1} \mid z_{t}, x\right) = \mathcal{N}\left(z_{t-1}; \mu_{\theta}(x_{t}, x_{0}), \sigma_{\theta}(t)\right]$$
 Learnable denoising distribution; assume Gaussian

$$\sum_{t=2}^{T} \left\langle D_{\mathrm{KL}} \left(q \left(z_{t-1} \mid z_{t}, x \right) \parallel p_{\theta} \left(z_{t-1} \mid z_{t} \right) \right) \right\rangle_{q(z_{t}\mid x)}$$

Denoising loss

$$\frac{1}{2\sigma_q^2(t)} \frac{\bar{\alpha}_{t-1} \left(1 - \alpha_t\right)^2}{\left(1 - \bar{\alpha}_t\right)^2} \left[\left\| \hat{x}_{\theta} \left(z_t, t\right) - x \right\|^2 \right]$$

The denoising objective

Given the nature of the forward (noising) process, $q\left(z_{t-1} \mid z_t, x\right)$ can be computed analytically

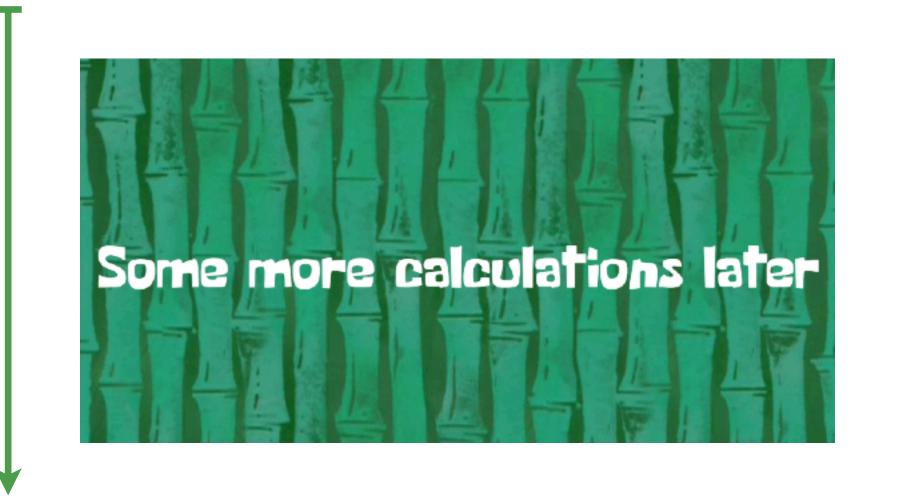

$$q\left(z_{t-1} \mid z_{t}, x\right) = \mathcal{N}\left(z_{t-1}; \mu_{q}(x_{t}, x_{0}), \sigma_{q}(t)\mathbb{I}\right)$$

$$\uparrow \qquad \qquad \uparrow \qquad \qquad \downarrow \qquad \downarrow \qquad \downarrow \qquad \downarrow \qquad \qquad \downarrow \qquad$$

$$p_{\theta}\left(z_{t-1} \mid z_t, x\right) = \mathcal{N}\left(z_{t-1}; \mu_{\theta}(x_t, x_0), \sigma_{\theta}(t)\mathbb{I}\right)$$

Learnable denoising distribution; assume Gaussian

$$\sum_{t=2}^{T} \left\langle D_{\mathrm{KL}} \left(q \left(z_{t-1} \mid z_{t}, x \right) \parallel p_{\theta} \left(z_{t-1} \mid z_{t} \right) \right) \right\rangle_{q(z_{t}\mid x)}$$

Denoising loss

$$\frac{1}{2\sigma_q^2(t)} \frac{\bar{\alpha}_{t-1} \left(1 - \alpha_t\right)^2}{\left(1 - \bar{\alpha}_t\right)^2} \left[\left\| \hat{x}_{\theta} \left(z_t, t\right) - x \right\|^2 \right]$$

The denoising objectives

x-prediction; MLE

$$\frac{1}{2\sigma_q^2(t)} \frac{\bar{\alpha}_{t-1} \left(1 - \alpha_t\right)^2}{\left(1 - \bar{\alpha}_t\right)^2} \left[\left\| \hat{x}_{\theta} \left(z_t, t\right) - x \right\|^2 \right]$$
